

The Lago Mar Resort & Club is proud to participate in a variety of environmental sustainability practices aimed at protecting and conserving Florida's natural resources and the overall environment.

We are going green!

Some of our planet-saving contributions are as follows:

Guest Room Initiatives:

- Towel and Linen Card – Place this card on your bed in the morning for a fresh set of linens. Please leave towels to be washed on the floor or hang towels you wish to reuse on the rack. Your choices make a big difference. Together we can conserve water, our most precious resource, and reduce chlorine and detergent use.
- An HVAC System sensors turn off the air conditioner when sliding glass doors to balconies are opened and restarts after door is closed.
- Energy-efficient windows
- Water conserving commodes
- Low Flow shower heads
- Faucet aerators
- High Efficiency Lighting

Public Areas and Non-Public Area Initiatives:

- Energy-efficient compact fluorescent light bulbs
- Programmable timers or sensors controlling air conditioning in low-traffic areas.
- Water-conserving urinals and commodes
- All outdoor lighting have timers and photo sensors
- Recycling Receptacle for disposal of all paper and plastic

Back of the House Initiatives:

- Recycle corrugated cardboard and office paper as well as plastic, Aluminum cans, newspapers, magazines, ink cartridges, glass, magazines fluorescent bulbs, batteries, and others.

The Lago Mar Green Team's initiatives are continuously evolving. If you have any suggestions that could enhance our environmental program, please feel free to do so.
